ENDO FM-1

Fetal Monitor

With its elegant design, foldable screen, and enhanced functionality, ENDO FM-1 fetal monitor would address the needs of obstetrical departments in both clinics and hospitals. ENDO FM-1 is amazingly lightweight and portable, which makes it suitable for outpatient service. With the latest technologies from ENDO FM-1 offers an extensive set of monitoring parameters such as FHR, TOCO, DECG, IUP, and fetal movement.

Multi-display Modes

Switching among three display modes, user may choose the most suitable one for clinical use.

Simple Workflow

1 Knob Operation:

Using the knob only, you may carry out every configuration to customize the machine according to actual clinical needs.

1 Button Operation:

Start button could be configured to integrate patient info and printing. This could help the doctor to simplify the workflow and work with 1 button only.

1 MHz waterproof FHR Probe

The use of 1MHz probe enlarges the penetration and deepens the range of detection, which is significant and positive in fetal monitoring, especially for big pregnant women. Furthermore, it is also proved that the lower the detection frequency of the probe, the better protection to the tissues of fetus.

Convenient to Carry or Transport

- Compact, portable and lightweight
- Long life Li-ion battery for outpatient service

Easy to Read & Operate

- 5.6" foldable screen
- Large numeric and waveform display
- Simple workflow with silicone buttons for operations

Advanced FHR Detection Technology

- Signals Overlap Verification to differentiate twins FHR
- FHR signal quality indicator helps optimize the probe position

Flexible Printing Options

- Built-in thermal printer
- Print on 150/152 mm width recording paper
- 1/2/3 cm/min real-time printing speed
- 15 mm/sec fast printing speed for history traces

Powerful Data Management

- 60 hours built-up memory for seamless monitoring
- MFM-CNS network for remote monitoring
- Insight software for data management on PC
- USB port to enlarge storage capacity
