## Optimal Fit

- A large array of component allows precise patient matching for optimal patient fit.
- Outer diameters from 38 to 60mm allow the surgeon to meet the unique challenges posed in revision and extended situations.
- The bipolar cup offers use with 22, 28mm femoral heads.

## Wide Range of Motion

- Enhanced 68° ROM resists the impingement to the UHMWPE locking ring.

## Proportional Eccentricity

- Multipolarity is achieved via multiple offsets within the system as cup sizes increase, the amount of eccentricity increases.
- Provides eccentricity that is proportional to the patient's anatomy.

## Simple Locking ring Mechanism

- Ring mechanism allows for easy assembly of the femoral head.

## Enhanced Stability

- Superior pull-out strength resists the dislocation of the femoral head.
